

MD25

4-direction lateral stacker for long loads and narrow corridors

360° MOBILITY

MD 25 lateral stacker is the ideal solution for handling of large goods dimensions in narrow spaces and to maximise the possibility of storing goods. Optimum for use in narrow corridors thanks to the transverse direction of travel, particularly suitable for transport of long loads.

STRENGTHS:

- Central tiller arm for **better transversal driving position** on both sides of the machine, during transversal direction of travel and during "traditional" travel
- **Electric steering system** for better manoeuvrability
- Intuitive and easily accessible **proportional hydraulic controls** (on control box)
- **Large FEM plate** for fork positioning outside the stabilisers and to **handle long loads** (upon request)
- Powerful **2 KW AC electric traction motor** with **CAN BUS** technology, with **speed control** on flat surfaces, uphill and downhill. Energy recovery for **longer battery life**.

✓ **LOAD CAPACITY UP TO 2.500 KG**

✓ **AVAILABLE UPON REQUEST**

✓ **SPECIAL DIMENSIONS UPON REQUEST**

SOME OPTIONALS

METALLIC/GALVANISED VERSION

LITHIUM BATTERY

SCALE/PRINTER

USE IN COLD STORE
